SHIV SINGH BAGHEL

Full-Stack Developer (Backend-Focused)

Bhopal, Madhya Pradesh, India | +91 7869124915 | shivsinghbaghel95@gmail.com

LinkedIn | GitHub | LeetCode | Portfolio

SUMMARY

Backend-focused full-stack developer skilled in the MERN stack, REST APIs, and DevOps tooling. Built and independently deployed production-style apps spanning e-commerce, real-time delivery tracking, and a self-hosted CI/CD pipeline with Docker, queues, and cloud storage. Solved 300+ DSA problems on LeetCode. Seeking fresher/internship roles in backend engineering.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Frontend: React, Redux Toolkit, React Router, Tailwind CSS, HTML, CSS
Backend: Node.js, Express.js, REST APIs, JWT, Socket.IO
Databases: MongoDB (Mongoose), PostgreSQL, Redis, SQL
DevOps / Cloud: Docker, Docker Compose, GitHub Actions — Continuous Integration (CI) & Continuous Deployment (CD), AWS (EC2, S3)
Tools & Others: Git, BullMQ, Cloudinary, Razorpay, Drizzle ORM, Zod
CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

PROJECTS

Self-Hosted CI/CD Deployment Pipeline (ShipFlow) *Personal Project*

GitHub

Tech Stack: *Node.js, Express, BullMQ, Redis, PostgreSQL, AWS S3, Docker, Docker Compose*

- Designed and built a self-hosted CI/CD deployment pipeline that clones a Git repository, auto-detects the package manager (pnpm/npm/yarn), and runs install, build, and test stages before publishing build artifacts to AWS S3.
- Architected a 6-stage release pipeline (prepare → build → test → deploy → verify → rollback) with release state persisted in PostgreSQL, enabling reliable failure tracking and retries without corrupting release history.
- Built a CLI tool to queue deployments and poll release status, and containerized the full system (API, background worker, PostgreSQL, Redis) using Docker and Docker Compose.
- Designed the system as two decoupled processes — a lightweight Express API and a separate background worker — so incoming requests stay fast while long-running build/test/deploy work is processed asynchronously off the request path.

Full-Stack Food Delivery Platform (Foodify) *Personal Project*

Live Demo | GitHub

Tech Stack: *React, Redux Toolkit, Node.js, Express, Socket.IO, MongoDB, Razorpay, Cloudinary*

- Built a full-stack food delivery platform with live delivery tracking, secure payments, and OTP-based authentication, deployed on Render.
- Implemented real-time delivery-partner location updates on an interactive map using Socket.IO, engineering reliable reconnection handling to correctly resync socket IDs to active user sessions after disconnects.
- Built secure JWT authentication (httpOnly, SameSite-strict cookies) with Google OAuth and a Nodemailer-based OTP password-reset flow; integrated Razorpay for payments and Cloudinary for image uploads.

E-Commerce Store — Full-Stack Shopping Platform *Personal Project*

Live Demo | GitHub

Tech Stack: *React, Node.js, Express, MongoDB, Razorpay, Cloudinary, JWT*

- Developed a full-stack e-commerce platform with 20+ REST API endpoints spanning authentication, product catalog, cart, and order management, deployed on Render.
- Resolved cart price/stock staleness by revalidating product price and inventory against live database data at checkout, preventing purchases based on outdated pricing.
- Implemented JWT authentication (httpOnly cookies) with Google OAuth login, and integrated Razorpay for payment processing and Cloudinary for product image uploads via Multer.

CERTIFICATIONS

- Full Stack Web Development — PW Skills (Physics Wallah) (Credential)
- System Design — PW Skills (Physics Wallah) (Credential)
- JavaScript (Intermediate) — HackerRank (Credential)

ACHIEVEMENTS & CODING PROFILE

- Solved 300+ problems on LeetCode (122 Easy, 197 Medium, 22 Hard).
- Built a Resume Builder application at a hackathon organized by Sheriyans Coding School.
- Published 2–3 technical articles on Node.js internals on LinkedIn.

EDUCATION

B.Tech in Information Technology *2023 – 2027 (7th Semester)*

Indira Gandhi Engineering College, Sagar

Relevant Coursework: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
